

Rajant LX4 Product Retirement Notice/EOL

Intent for Retirement

The purpose of this notice is to communicate the retirement of Rajant’s LX4 Series of Portable Wireless Mesh Network Nodes. First notification of this retirement took place in February 2015. Depending on the specific models, the following conditions apply to this product’s end of life status:

- Rajant will continue to accept orders for the following LX4 models until October 31, 2015 – LX4-2495, LX4-2250, LX4-2954, LX4-2295, LX4-2255. The last warranty repair for these models will be 12 months from date of purchase according to Rajant’s documented Warranty policy.
- Rajant will continue to accept orders for the following LX4 models until March 31, 2016 – LX4-4442, LX4-4441, LX4-2951, LX4-2291. The last warranty repair for these models will be 12 months from date of purchase and according to Rajant’s documented Warranty policy.
- No repairs will be available on the above LX4 models once product is outside of the standard 12 month warranty timeframe. Extended warranties are not available.
- The final software release for LX4 will be no later than 9/30/15.
- LX4 spares may be purchased with additional discounts or customers can upgrade to Rajant’s LX5 product portfolio. Purchases can be made through any of Rajant’s authorized Kinetic mesh partners.

General Information

Retirement of Rajant LX4 Series BreadCrumb™ Nodes

FINAL NOTIFICATION DATE:

July 2, 2015

REGIONS IMPACTED:

NA, EMEA, APAC, LACA

Reason for Retirement

Rajant is dedicated and focused on continual R&D around our BreadCrumb™ portfolio. The LX5 is now our highest performance wireless mesh node and represents the industry’s leading mesh technology for the industrial markets we serve. The LX5 is Rajant’s most advanced multi-radio node and contains up to four transceivers and six antenna ports. With up to 270 Mbps maximum physical layer data rates and supporting 2 x 2 MIMO, the LX5 also supports several strong cryptographic options for data and MAC-address encryption. All Rajant BreadCrumbs are backwards compatible so no forklift upgrades required.
